Mining ENGLISH	Inscription:		10,000 F Books: 10,000 FCFA
Petroleum ENGLISH			

DIPLOMA IN INFORMATION TECHNOLOGY

State Diploma (WAEC/BTS) delivered by WAEC, Powered by MTS

- Hardware and Networking
 - Software (Word, Excel, Pwrpoint, Access) and IT
 - Information Systems and SQL
 - Marketing
 - Human Resource Mgt
 - Software Development
 - Business Letters
- Fees: 200\$/term - 2 years

OTHER COURSES

- Oracle OEMDBA - USD300 / Oracle RAC DBA USD600
- Desktop and Cloud Based Software Development 300\$/lang
- FOT/Splicing Cabling Premises - USD300
- FOT/Splicing Outside Plant - USD400

TELECOM MIS ENGINEERS

Telecom Business Operations such as voice, SMS, Data, VAS...etc are captured by the switch as subscribers make calls. Call Detail Records (CDR) are saved into files and later transferred into CDR Analysis Server as IN_CDR, Voucher_CDR, Bonus_CDR, Adjustment_CDR, Activation_CDR...etc.

But sometimes, there are breakdowns, that prompt management to ask:

- Are there not missing files from the switch?
- Are there not any missing records from the transferred files?
- Procedures to prepare the reports - Are they well written and scheduled?
- What about the jobs - Are they successfully executed? What about Data Accuracy Check?
- How can the Sales Manager get the Sales Records (Voice, SMS, Data...etc) of yesterday?
- How can the Marketing Dept check the performance of the promotion?
- How can the Customer Relationship Manager get the list of postpaid subscribers accounts to know how much they are owing?
- How do we get the list of churned subscribers today?
- How can the accountant, with his primitive accounting knowledge, check the accuracy of the data given to him since he lacks the technical MIS Engineers expertise?
- How can an auditor audit the telecom accounts since he can't cross check the data?

Telecom companies face these challenges every day.

Without MIS Engineers - Overall Management Decision Blocked
Sales Information Absent
Marketing Performance Poor
Productivity Low

But these can be averted with MTS TELECOM MIS ENGINEERS TRAINING.

You only need four (4) modules to become a solutions provider for the telecom companies in MIS Department:

MTS CERTIFIED TELECOM MIS ENGINEER

- TELECOM DATABASE ADMINISTRATION I
- TELECOM DATABASE ADMINISTRATION II
- SQL ACCOUNTS TECHNOLOGY
- TELECOM AUDIT AND ACCOUNTS

FEES: US\$ 300/MODULE (training/Exam)

FRIENDS, OUR PROBLEM TODAY IS NOT

"LACK OF JOBS - BUT LACK OF EXPERTISE TO TAKE UP THE JOBS"

ERP MIS ENGINEERS

When Resources in an enterprise are carefully organized, planned and computerized, we call it ENTERPRISE RESOURCE PLANNING (ERP) APPLICATIONS. ERP Software Packages are generally built with the following modules: Sales, Purchases, Customer Relationship Management (CRM), Supply Chain Management (SCM), Inventory, Production, Human Resource, Business Finance, and Accounts. Formerly, applications with these modules were called Accounting Software.

Modules in ERP Software are fully integrated and can be operated anywhere, anyday and anytime. For instance, the CRUDE OIL Production module of Tullow Oil ERP could be operated in Ghana and other modules of the same software may be used in other parts of the world. Today's Banking applications are ERP-Oriented designed with country code and branch code, and this helps the bank to operate in any part of the world while maintaining a single Customer Relationship Management (CRM) database

WHICH COMPANIES USE ERP SOFTWARE?

Any entity which keeps records in terms of money uses ERP Software. Examples of such organisations are: Banks, Oil and Gas Companies, Manufacturing Industries, Telecom companies, Mining, Agric and Healthcare, which are the 7 applications fields of MTS Certification

WHO CAN BE MTS CERTIFIED ERP MIS ENGINEER?

- You must have deep understanding of the database structure of all these 7 MTS applications fields
- You must have the technical know-how of Oracle Database and PL/SQL Developer or any other database approved by MTS Certification.
- You must have correct understanding of the types of reports that these 7 industries use and how to write scripts to generate those reports with Oracle PL/SQL Developer - Get MTS Syllabus and Projects for better understanding.

Software helps companies to build database and when the data grows, data mining is necessary and that is the time MIS Engineers are needed to sift through large pool of data to extract meaning, trends and hidden patterns which were previously unknown.

This is the age of DATA MINING and BIG DATA ANALYTICS.

Fees: 300\$/module (Training/Exam)

MTS CERTIFIED ERP MIS ENGINEER

- ERP Database Administration I
- ERP Database Administration II
- SQL Accounts Technology
- Banking/Oil&Gas/Mining

Database Admin & Software Dev.

Oracle Database Administration

- Oracle Database Administration I - Win \$ 300
- Oracle Database Administration II - Linux \$ 350
- Oracle Database Administration III - RAC \$ 400
- Oracle Database Administration IV - ODA \$ 600

Oracle Software Development

- Oracle ASP Software Development \$ 600
- Oracle Java Server Pages Software Development \$ 800
- Oracle Visual Basic Software Development \$ 500

Who are we?

BTC is a company of the African Diaspora Marketplace, ADM II, an Institution of United States Agency for International Development (USAID) and the Western Union Foundation MTS Certification is a division of BTC.

LECTURERS

The course is handled by highly qualified professionals from industry, with years of Experience in Telecom Database, Banking and Oil and Gas, which they are sharing with graduates willing to join them in the industry.

JOIN US TODAY - mailto: missionsoftgh@gmail.com

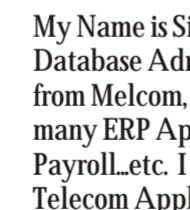

These are the PROOFS

Henry Lut is his name. He wanted to become a Telecom MIS Engineer. He joined Missionsoft Industrial Solutions and got trained in Telecom and ERP Database Administration. As soon as He completed the MIS Engineers modules, an opportunity arose and He seized it. "The training has made me expert in SQL to perform Data Mining Operations in Telecom domain where I am working now", TechMahindra

Sam Delassee joined the MTS Training and Certification October 2011. It was his desire to become Telecom Database Administrator in one of the leading telecom companies in Ghana. He successfully passed the MIS Engineers Exam in April 2013. Sam Dela is now a DBA in Vodafone Ghana. Hear his testimony: "The course material was exhaustive enough to equip me for the new role I have risen to in Vodafone GH in the capacity of DBA. I therefore Will recommend the training to anyone interested."

My Name is Simeon Hude. I am also MTS Certified Telecom and ERP Database Administrator and Software Developer. I started working from Melcom, and later moved to BSystems where I developed many ERP Applications such as Assets Management, HRMS and Payroll.etc. I also worked with Zain now Airtel as MIS Engineers and Telecom Applications Developer. Now I am with TIGO. I recommend MTS to anyone wants to become Certified Telecom ERP/MIS Engineer

My Name is Nuamah A. Shirley. I joined MTS Training in Telecom and ERP Database in October 2011. I was more interested in ERP especially Banking and financial database including Insurance database. I am currently working at Glico Life Insurance at Tarkwa. Join MTS Today and you will be equipped with practical training in Telecom and ERP Database.

MTS Certified ERP MIS Engineer, Software Developer and Systems Administrator Now at ECOBANK, Formerly at UNIDO

Mr. YAO Modenou joined MTS, completed ERP MIS Engineers, Software Development and Systems Administration and Networking. He taught in the school before moving to UNIDO where he travelled extensively. He is currently working at ECOBANK.

TRAINING PLAN

LEVEL	PERIOD 1	PERIOD 2	PERIOD 3
BAC/A LEVEL/SSS Graduates	English Proficiency MTS or any other recognized one	BTS Ghaneen (Dip. In IT by WAEC) after 9 months	MTS MIS Engineer by MTS 9 months
BTS or HND	English (6 Months) (francophones only)	N/A	MTS MIS Engineer by MTS 6 months
License/1st Degree	English (6 Months) (francophones only)	N/A	MTS MIS Engineer by MTS 6 months
Masters and Doctorate Degree	English (3 Months) (francophones only)	N/A	MTS MIS Engineer by MTS 3 or 6 months

CONTACTS

GHANA: +233 268 090 096
+233 262 680 865
